Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a system and method for accessing a remote server, classified in class 709, subclass 219.
 - II. Claims 13-21, drawn to a system and method for data structure, classified in class 707, subclass 100.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in a system lacking the method for accessing a remote server, particulars. See MPEP § 806.05(d).
3. These inventions are distinct for the reasons given above, and the search required for each Groups is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:
 - (a) the Group I search (claims 1-12) would require use of search **Class 709, subclass 219** (not require for the invention II).

(b) the Group II search (claims 13-21) would require use of search **Class 707**,
Subclass 100 (not require for the invention I).
